To:

Sabrina,

I gave Barry the same packet of maps and spreadsheets that I sent over to you and he is looking over them to get an idea about the potential listing for Animas.

Kent has not been able to make contact with Gary Struthers yet about the data validation.

I am going to be out of the office all of next week with no email, so if you have any questions/ concerns on the data, get in touch with Barry. I will be out of the office tomorrow, but will have email/ cell phone if you think of anything you need to get done quickly.

Thank you!

Sabrina,

Surface water and sed sheets are attached. I made a few changes to the water sheet.

I put hard copies of the spreadsheets and a map in the mail to come down to EPA this afternoon.

Re: Animas ARR data summary

Thanks for the summary. I will review it ASAP. Can you send over an extra copy of the large sample location map with the inset also printed out if need be so that I can plot some data by hand and get a picture of whether or not the NPL-caliber story is here or not.

Sincerely,

Sabrina Forrest

Subject: Animas ARR data summary

Sabrina,

The Animas October 2010 water data summary is attached. The locations are organized from the highest upstream locations to the downstream locations. The sheets are formatted to print to 1 page wide by 2 pages tall with headers repeating on second pages.

I am applying the same format to the sediment data.

Kent is working on getting in contact with the Gary Struthers contact to get a delivery date on the validations. I will let you know when I hear anything from him.

Regards,

Megan J. Dudevoir
